Personal Bio

Creative and ambitious, I am trying to apply my knowledge in JavaScript user interface technologies - REACT, Next, GraphQl, MongoDB, SQL - and create a RESTful API access level management design to have a direct impact on the business and Company customers.

After gaining experience in graphic design, film and photography, I was ready for another challenge. After a little research and few online courses, I realized that I really enjoyed this new field and decided to take a 3 month Immersive Web Development course. After gaining experience as a React Front-end Junior Developer I would like to continue looking for other challenges such as Web Developer or Software Engineer.

Skills

Front End: JavaScript, REACT, HTML, CSS, Bootstrap, StoryBook JQuery, SASS, Bulma, Next, Intl
Back End: Python, SQL, AWS, MongoDB, Express, GraphQL, Firebase, Apollo, JSON, ajax
Version Control Software: Git, Git-Hub, Heroku
Manager Packages: npm, Yarn
Testing: JEST, Jasmine, Mocha, Chai
Graphic Designer: Photoshop, InDesign, Freehand, Animate CC, Illustrator, Photographer,
Cinema Director (Audio-visuals): Final Cut, Premier Pro,
